AI Usage Declaration Form

Referencing the Output of Artificial Intelligence Language Models

- *Output text of an artificial intelligence language model (such as a ChatBot) for written assessment items of this unit will not be treated as your own work.*
- *If any output text is used, it must be quoted in italics, and the app or website must be referenced appropriately (AI language model Name/Chatbot Name, Developer or Organization, date accessed).*
- *If any output ideas are used and paraphrased, the app or website must be referenced appropriately (AI language model Name/Chatbot Name, Developer or Organization, date accessed).*
- *If the output of an artificial intelligence language model is prescribed by your Lecturer as an integral part of an assessment item, the app or website must be referenced appropriately (AI language model Name/Chatbot Name, Developer or Organization, date accessed).*

(excerpt from Unit Information)

Step 1: Select the declaration statement that best describes the level of AI tool usage in this assignment.

Table 1. Declaration Statement

Tick (✓) only 1 statement that applies	Declaration statements
	Declaration 1: We do not use any content generated by AI tools to be presented as our work.
	Declaration 2: We acknowledge the use of AI tool(s) to generate materials that aid with the process of completing this assessment (e.g. for background research or self-study). None of these materials are presented as our work.
x	**Declaration 3:** We acknowledge the use of AI tool(s) to generate materials that are included in our work in modified forms.

Step 2: Complete the following form if you selected either Declaration 2 or Declaration 3. You do not need to complete this section if you select Declaration 1.

Table 2. Details of AI Usage

Copy and paste the URL to your AI conversation history below (see how to do): Danielle Whitney: https://vscode.dev/github/DanDooLoo/HIT140_Assessment-2_Group23/blob/main

Explain in detail how the evidence presented in your AI conversation history is aligned with your chosen Declaration statement above: I, Manuela Crannis, only used otter.ai as the only use of AI for this assignment. It was used only taking meeting minutes which is uploaded on Teams. I, Danielle Whitney used AI: I used otter to create meeting minute for group meetings. I used copilot to generate characterisations png's of group 23 members for GitHub wiki and readme.md. I used GitHub Claude to peer review my coding. No changes were made to my coding by AI. I specified this in the chat with Claude. I. Judith. Dawson did not use AI. I, Gabrielle Davis, used Copilot to help me generate some code that helped me calculate some variables. Specifically – 'days since last played' and 'average goals from teams last 3 matches' (extend this section as necessary)

Acknowledgment

We acknowledge that where concerns about academic integrity arise, we may be required to provide evidence demonstrating that the work is our own. This may include research notes, annotated bibliographies, drafts, or version histories. We may also be required to present, explain, or defend our ideas verbally in real-time (face-to-face or online) as part of demonstrating the authenticity of our work and our understanding of academic concepts. This evidence may be used to further determine the final grade of our assessment.
